

Pow Wow Rocket Launch Event 2019

Eggcellent Recovery

Commanders this years Pow Wow theme is Space.

We will be doing a competition with ROCKETS.
We will be using the Estes Rocket Eggscaliber.
<https://www.estesrockets.com/rockets/kits/skill-2/002123-eggscalibertm>

Each Out Post is asked to pick a team of 3-4 boys to build the Rocket. And one leader to over see their work.
The team should include at least one boy from, DR, AR & ER if you have all 3 age group's in your OP.

The rockets will be judged by my sons and I for assembly and painting.
Any rocket NOT assembled correctly will be given 1 chance to make the changes needed for a safe flight.
I highly recommend you launch your rocket at least 2 times before Pow Wow using engine C6-5 with a hard boiled egg as the payload.
<https://www.estesrockets.com/rockets/engines/standard/001614-c6-5>

We will launch all rockets at Pow Wow after the other competitions end so everyone can enjoy the launches.
Do NOT bring any launch equipment or engines to Pow Wow.
We will have a launch pad and wireless controller so no one goes near the rockets after the engines are installed.
There will be a \$10 charge for 2 engines for each entry.
This will cover 2 flights and RAW EGGS for the POW WOW launches.
You will be able to choose 1 boy for each launch to press the firing button.

Feel free to contact me if you have any questions or would like to borrow a launch pad or electric launch controller.
